EDGE via USB speeds up your business

EDGE Speed ES75

EDGE Speed ES75
exceptional speed with EDGE

The EDGE Speed ES75 modem is based on GSM/GPRS MC75 module with integrated EDGE technology. This modem handles highly data-intensive multimedia applications - such as downloading and streaming of audio and video data, transmission of digital photos and instant messaging services - with exceptional speed and reliability.

With Quad-Band capability, the EDGE Speed ES75 can be used in all the existing GSM networks in America, Europe and Asia, guaranteeing seamless communication.

The user friendly software allows easy installation, GPRS connection, GSM connection with SMS functionality.

The ES75 Modem is ideally suited for:

- Internet
- Metering
- Fleet management
- Traffic control
- POS terminals
- Vending machines
- Freight tracking
- Security systems
- Remote controling
